RESULTS

We specialize in Workers' Compensation surveillance to uncover insurance fraud for government entities, corporations, and private businesses throughout America. Our investigations frequently reveal the people who commit fraud by discreetly monitoring their physical actions while falsely claiming a disability. At Special Solutions, Ltd., our Investigators have the tools and resources to catch someone in a fraudulent workers' compensation claim. Our private insurance investigators can utilize legal and effective surveillance techniques to uncover what is a real claim and what is not. Such findings can relieve employers and taxpayers of funding a rehabilitated person's extended falsified vacation.
